Doyle Wailes, Snowbird  
Malcolm Hughes, Snowbird

Time In: 1305 hrs

Time Out: 1435 hrs

Weather Conditions: Sunny, ~ 75<sup>0</sup> F

Report Prepared by: Jon Parry

### Facility Description:

Snowbird Corporation is a ski and summer resort that employs about 700 people in the summer and 1700 in the winter.

### Credentials, Purpose, and Scope:

The inspector met with Jay Jensen and Randy Keisker of Snowbird Corporation. The purpose of the inspection was to access's the facility's hazardous waste management practices for compliance with R315 of the Utah Administrative Code (the Rules). The scope of the inspection included a tour of the facilities and a review of their required records and plans.

**Waste Streams, Management Practices:**

Snowbird estimates that they may generate about 5 gallon of potentially hazardous waste per month. In the past they did more painting of various types of vehicles and equipment and generated more hazardous waste.

The maintenance facility generates used oil which is burned on-site in a space heater. The facility does have a parts washer that uses a Stoddard solvent which is mixed with the used oil when spent.

**Facility Inspection:****R315-5 Hazardous Generator Requirements:**

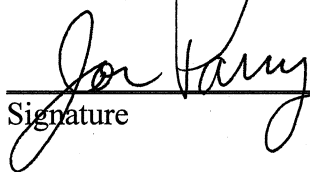

- 5-1.10      Applicability: No problems noted.
- 5-1.11      Hazardous Waste Determination: No problems noted.
